CHOICE OF THE ATA

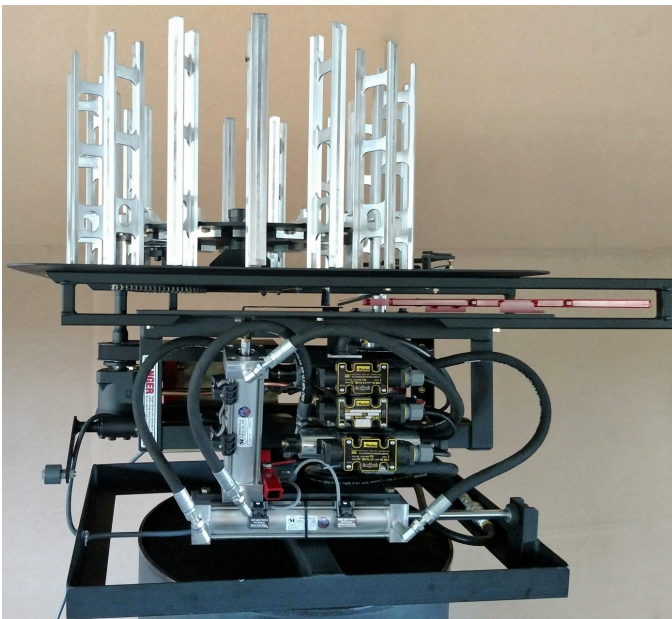

The Best Automatic Doubles Trap Machines Period!

In the 1980's, Stuart W. Patenaude thought that there had to be a better way to throw doubles targets. Stuart went to work in his modest workshop. Using parts from an old AMC Pacer and over a year of development, he created the first Pat-Trap® Automatic Doubles Machine. Since that first machine we have strived to continuously improve and engineer the finest traps. Thousands of traps later, Pat-Trap® has emerged as the new standard for the sport of Trapshooting, and is the official supplier to the ATA Home grounds.

Our standard Automatic Pat-Trap® throws both single and double targets. Our Pat-Trap® Wobble version throws singles, doubles, wobble singles, and wobble doubles.

More registered targets are thrown from Pat-Trap® than from any other automatic trap machine!

We pride ourselves in the quality of our workmanship and our attention to prompt personal customer service and technical assistance.

Standard Pat-Trap with Four Case Turret

Stuart Patenaude loading some early model Pat-Traps

With today's ever increasing array of state and insurance regulations, the **Pat-Trap®** will pay for itself in no time. No personnel in the trap house means safety and savings. Double scores can increase due to the ease and convenience of changing from singles to doubles in seconds allowing more practice time. The **Pat-Trap®** can make shooting more enjoyable and economical.

The **Pat-Trap®** fits ATA regulation trap houses. **Pat-Trap®**'s no-nonsense design is simple to operate, maintain, and easy to load. The standard turret (magazine) holds four full cases of targets (540+) and an optional side loading turret is available.

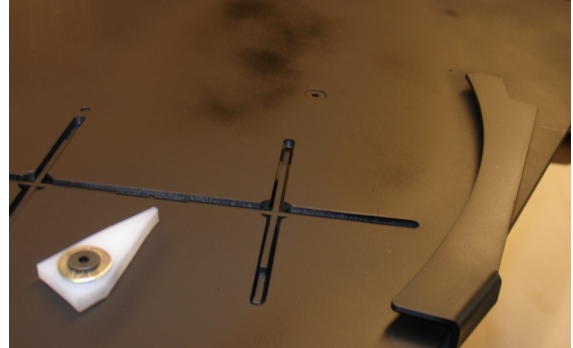

The vibration free **Pat-Trap®** features commercial grade, heavy duty steel construction, sealed ball and roller bearings, and olite bushings. It is fully adjustable for wind-age and elevation.

The **Pat-Trap®** uses 110 volts AC / 20 amp. The **Pat-Trap®** is compatible with most voice release systems thus eliminating the need for pullers.

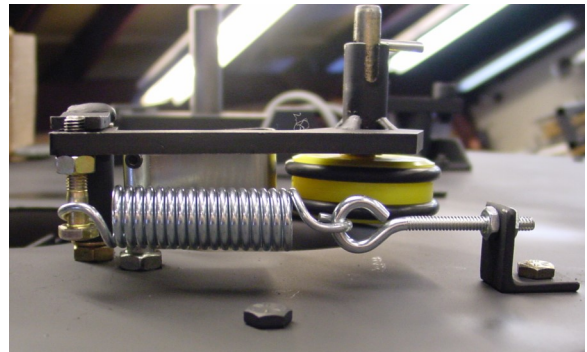

The Most Reliable Trap and Skeet Machines!

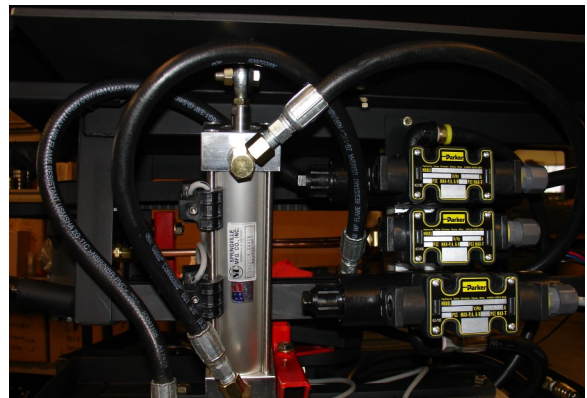

- **More registered targets are thrown from Pat-Trap® than from any other automatic trap machine!**
- **Four Case Turret (540 Targets).**

CHOICE OF THE ATA

All Standard Pat-Trap® Machines now feature:

Easy access magnetic Reed Switches that facilitate simple adjustments for setting the proper field angles

Fine Tooth Elevation Cogs for establishing proper target height

Main Spring Clutch Systems for longer spring life while eliminating vibrations

Pat-Trap® Skeet Machines

Pat-Trap® now offers a line of **Skeet Machines** built upon the proven platform of the original Pat-Trap®. Our Skeet machine pairs throw the most consistent Targets. Shooting complexes love the ability to stock parts that are common to both their trap and skeet machines.

Each Skeet machine holds five cases (675 targets), and has built in elevation and windage adjustments. **Wobble Skeet** version also available .

Each Skeet Pair features the Pat-Trap®'s famous heavy duty construction and reliability for the most consistent target presentation.

Standard Skeet Machine with Five Case Turret

Easily accessible windage and height controls for quick set-up angles.

Maintenance free elevated rollers for cleaner operation.

Direct-drive Hydraulic Pump with Synthetic Oil for consistent operation in all temperature extremes.
